Community Building con OpenAIRE CONNECT

Alessia Bardi
Miriam Baglioni
CNR-ISTI
Research communities

- National initiatives
- Projects and research networks
- University Alliances
- Research infrastructures

Goals
- Maximise impact on the research landscape
- Maximise impact on society
- Improve research quality
- Increase visibility

Strategic activities
- Wide dissemination of policies and best practices
- Wide dissemination of research results
- Monitor research production
- Promotion and monitoring of Open Science practices
- Training

Challenges
- Get recognition from funders and research staff
- Data gathering and analysis for reporting
- Attract funding
- Sustainability of service provision

Projects and research networks

Goals

Strategic activities

Challenges

OpenAIRE
https://connect.openaire.eu
It lowers the barriers that hinder the adoption of Open Science publishing practices in the research community

- Discovery in the literature and data deluge
- Dispersion of research products
- Lack of community awareness
- Lack of Open Science publishing services and tools

OpenAIRE CONNECT is a tool for Open Science, community building and outreach
A portal with:

➢ A customised view of the OpenAIRE Graph
➢ Discovery and tracking functionality
➢ Complete branding capabilities
A facilitator of OS practices

➢ Linking & claiming research
➢ Finding repositories
➢ Open & FAIR metadata
How does CONNECT work?

1. Identify relevant research products
2. Gateway configuration
3. Delivery

https://doi.org/10.5281/zenodo.3974604
Who’s using OpenAIRE CONNECT

➢ 33 Gateways (+65% since Dec 2021)

Full list at https://connect.openaire.eu/search/find(communities
Usage of metadata

+2000 downloads since May 2022

+400 downloads since May 2022

Powering non-OpenAIRE portals with data

FIT FORTHEM team working on metadata to create a portal on research teams and ancient volumes
Community Gateways already in action.
