Sommario

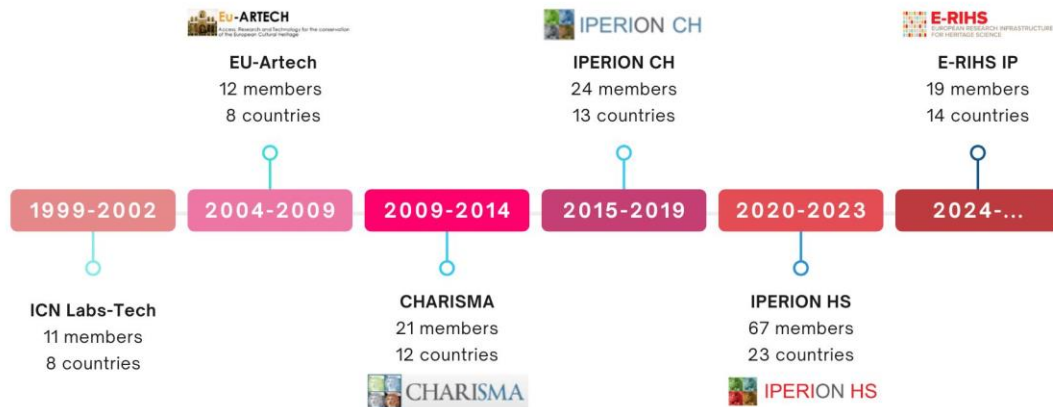

1. Introduzione: i progetti infrastrutturali nelle scienze del patrimonio

Progetti infrastrutturali nel settore delle scienze del patrimonio

>20 YEARS OF EUROPEAN COOPERATION

A visual history

IPERION HS

Type of action

H2020-INFRAIA-2019-1

Partners

23 countries, 67 members

Duration

48 months (2020 -2024)

EU Contribution

€ 6.162.711,12

Website

www.iperionhs.eu

- **Goal:** promoting heritage science and reach new communities
- It is an **Integrating Activity** for a distributed pan-European research infrastructure
- It offers a **unified scientific approach** to the most advanced European instruments for the analysis, interpretation, preservation, documentation and management of heritage objects.
- **3 platforms** (scientific archives, fixed laboratories and mobile laboratories) to offer **cross-border access** to an impressively wide range of high-level scientific instruments, methodologies, data and tools
- **HS Academy**

E-RIHS Implementation Phase (IP)

Type of action

HORIZON-INFRA-2021-DEV-02

Partners

14 countries, 19 members

Duration

39 months (2022 -2024)

EU Contribution

€ 1.698.316,25

Website

www.e-rihs.eu

- The mission is to **deliver integrated access to interdisciplinary expertise, data and cutting-edge technologies.**
- It will integrate world-leading European facilities into an organisation with a clear identity and a strong cohesive role within the global heritage science community.
- The E-RIHS IP project will bring together representatives of national nodes of countries that expressed their willingness to **support the establishment of the European Research Infrastructure Consortium (ERIC).**

E-RIHS

E-RIHS diventerà un'entità legale stabile nella forma di un ERIC (European Research Infrastructure Consortium) alla fine del 2024 con sede a Firenze, alla Manifattura Tabacchi.

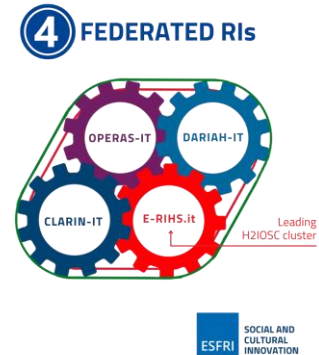

COME DISCOVER MANIFATTURA TABACCHI

The contemporary district in Florence where you can live, work, relax, and have fun. Shops, ateliers, restaurants, cafes and events centered around art,

H2IOSC

- Il nodo Italiano di **E-RIHS** ha ricevuto finanziamenti PNRR per consolidare le sue risorse digitali e accelerare la trasformazione digitale nelle scienze umane e nei vari settori del patrimonio culturale. Sta partecipando al Progetto H2IOSC, insieme ad altre infrastrutture di ricerca: DARIAH, CLARIN, OPERAS

H2IOSC Project - Humanities and cultural Heritage Italian Open Science Cloud funded by the European Union – NextGenerationEU – NRRP M4C2 - Project code IR0000029 - CUP B63C22000730005.

<https://www.h2iosc.cnr.it/>

Scienze del patrimonio: punti di forza e criticità

- La comunità che opera nel settore delle scienze del patrimonio è una comunità fortemente multidisciplinare: ricca e complessa...
- Mancano un'ontologia comune e vocabolari condivisi: I ricercatori parlano linguaggi diversi e usano metodologie diverse; uno stesso termine può indicare cose diverse nell'ambito delle varie discipline
- I ricercatori pubblicano su riviste di settore diverse
- ...e depositano i dati della ricerca in repository diversi (istituzionali, di settore, etc...)

2. Soluzioni digitali per migliorare la gestione e la visibilità della ricerca nel settore delle scienze del patrimonio

Strumenti digitali per un'infrastruttura di ricerca FAIR

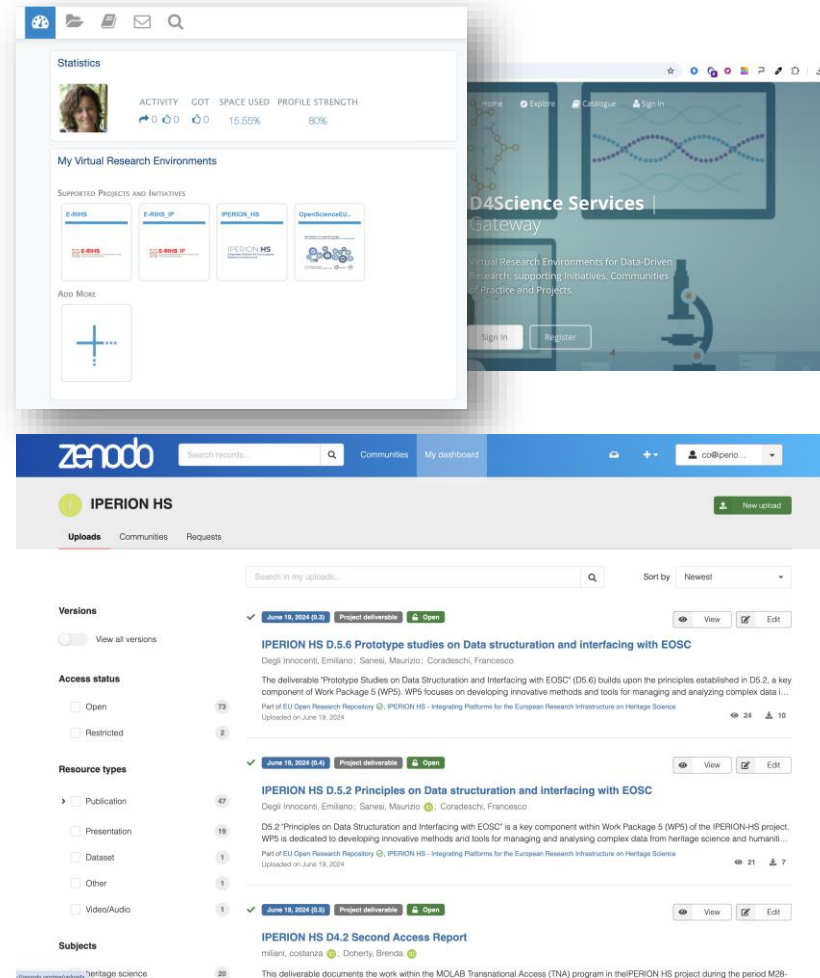

D4science – VRE di progetto ad accesso riservato per archiviare documenti, reports, datasets, etc...

<https://www.d4science.org/>

Zenodo – repository per pubblicare in maniera FAIR deliverables, reports, video, altri prodotti della ricerca....

<https://zenodo.org/communities/871034/>

<https://zenodo.org/communities/e-rihs/>

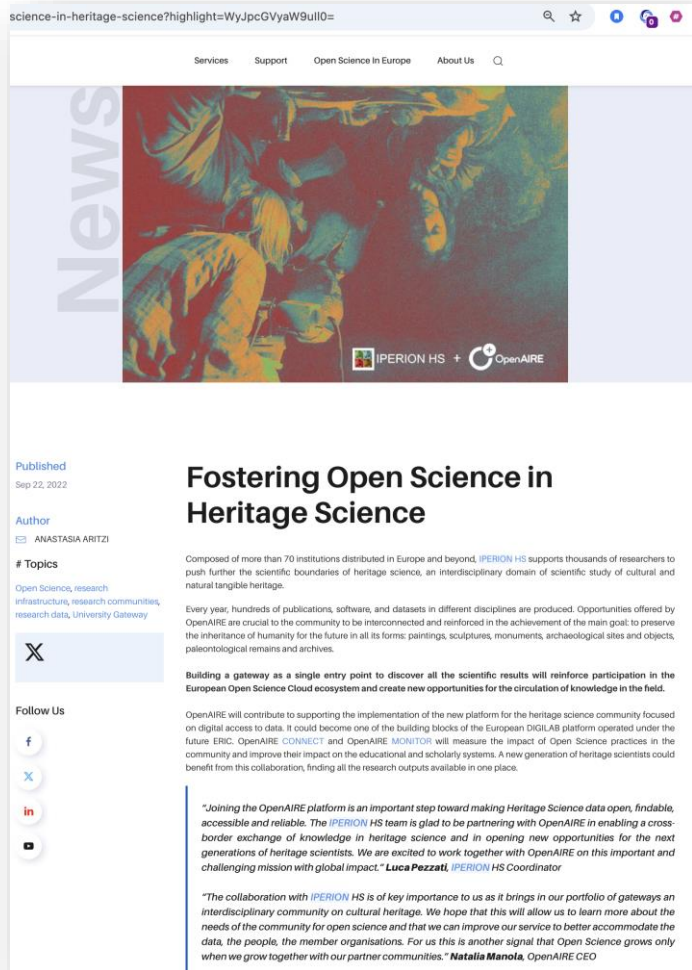

The image shows a Zenodo user interface. The top part is a user profile for 'IPERION HS' with statistics: ACTIVITY (0), GOT (0), SPACE USED (15.55%), and PROFILE STRENGTH (80%). Below this is a section for 'My Virtual Research Environments' showing links to E-RHS, E-RHS_IP, IPERION_HS, and OpenScienceEU. The main content area displays a list of uploads for the 'IPERION HS' community. The list includes three entries, all dated June 19, 2024 (0.3), and marked as 'Project deliverable' and 'Open'. The first entry is 'IPERION HS D.5.6 Prototype studies on Data structuration and interfacing with EOSC' by Degli Innocenti, Emiliano; Sanesi, Maurizio; Coradeschi, Francesco. The second is 'IPERION HS D.5.2 Principles on Data structuration and interfacing with EOSC' by the same authors. The third is 'IPERION HS D4.2 Second Access Report' by millari, costanza; Doherty, Brenda. The interface includes search bars, filters for versions, access status, resource types, and subjects.

OpenAIRE

Nel 2022 OpenAIRE e IPERION HS hanno firmato un Memorandum of Understanding.

Obiettivi:

- facilitare la ricercabilità dei prodotti della ricerca nel settore delle scienze del patrimonio
- monitorare l'impatto del progetto IPERION HS nel settore della ricerca delle scienze del patrimonio
- valutare le sue pratiche Open Science.

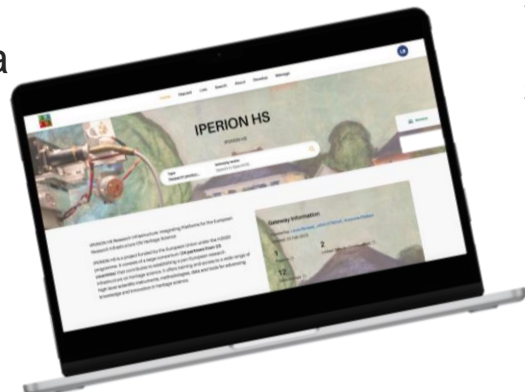

The screenshot shows the OpenAIRE website interface. At the top, there is a navigation bar with 'Services', 'Support', 'Open Science In Europe', and 'About Us'. Below this is a large banner image with the word 'News' on the left and a colorful abstract image on the right. The main content area features a news article titled 'Fostering Open Science in Heritage Science' published on Sep 22, 2022, by ANASTASIA ARITZI. The article discusses the collaboration between IPERION HS and OpenAIRE to support heritage science research. It mentions that IPERION HS supports thousands of researchers and that the collaboration aims to create a gateway for scientific results in the European Open Science Cloud ecosystem. The article also includes quotes from Luca Pezzati, IPERION HS Coordinator, and Natalia Manola, OpenAIRE CEO, expressing their excitement and the importance of the partnership.

3. OpenAIRE Connect: I due gateway IPERION HS e Heritage Science

OpenAIRE Connect

OpenAIRE CONNECT è un servizio che ci ha consentito di sviluppare un portale personalizzato per ricercare e condividere i prodotti della ricerca open science nel settore delle scienze del patrimonio.

OpenAIRE CONNECT ha aumentato la visibilità e la diffusione dei prodotti della ricerca all'interno della comunità e oltre.

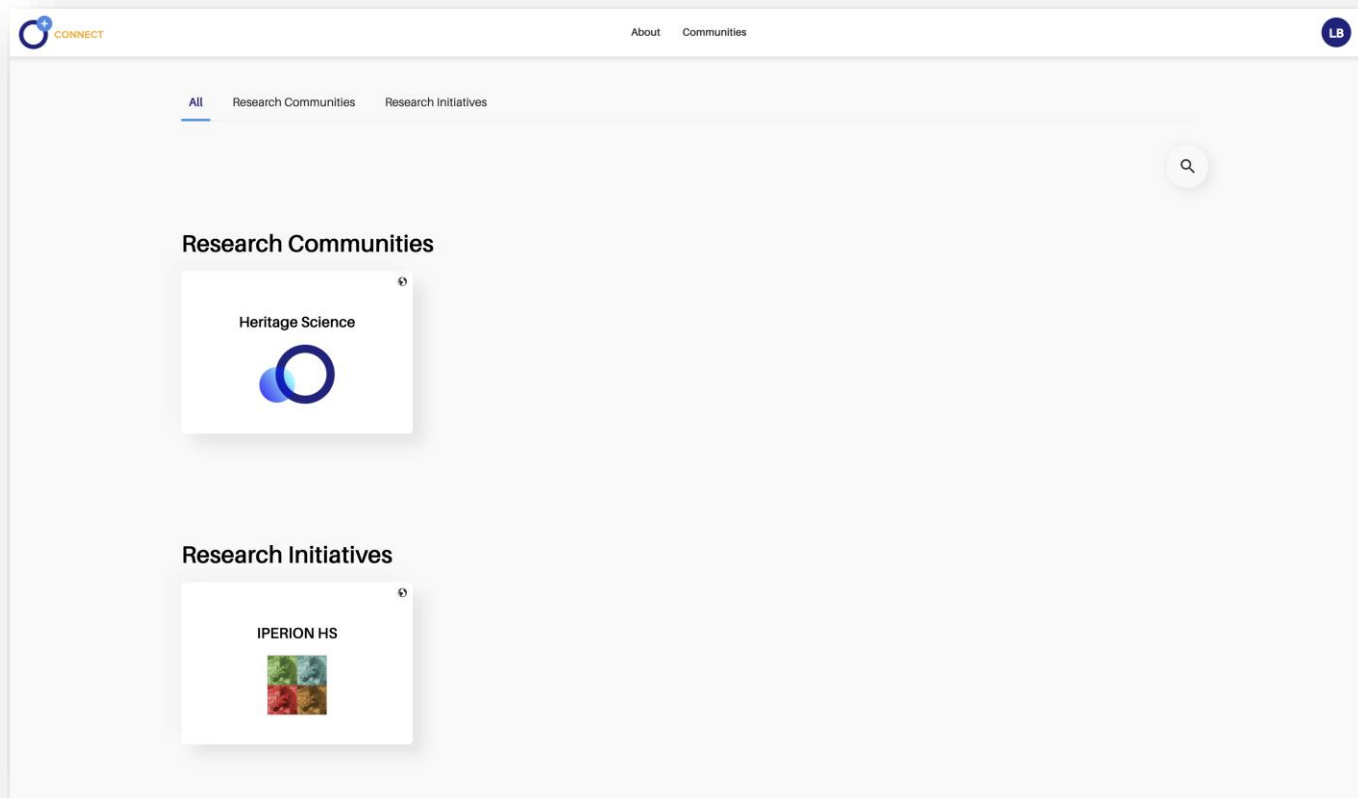

OpenAIRE Monitor

OpenAIRE Monitor Dashboard è un piattaforma che consente di tracciare i prodotti della ricerca e monitorarne l'impatto in termini di punti di forza o debolezza, valutare le metriche Open Science, valutare i costi, ma soprattutto consente di prendere decisioni strategiche e migliorare le pratiche della ricerca.

Connect and Monitor manager

OpenAIRE Connect IPERION HS

<https://iperionhs.openaire.eu/>

The screenshot shows the IPERION HS OpenAIRE Connect website. At the top, there is a navigation menu with links for Home, Deposit, Link, Search, About, and Develop, and a Sign In button. The main header features a large image of a scientific instrument with the text "IPERION HS" and "IPERION HS" below it. A search bar is present with the text "Type Research products" and "Scholarly works Search in OpenAIRE". Below the header, a "Production" section displays four statistics: Publications (165), Datasets (11), Software (13), and Other Research Products (11). At the bottom, a "Supporting Organizations" section lists various institutions with their logos: Consiglio Nazionale delle Ricerche, IRPA KIK, ANTECIPA (Associação Nacional de Pesquisa em Tecnologia e Ciência do Nordeste), IIR, ITA, Institut für Hochenergiephysik (Maximilian-Universität Erlangen-Nürnberg), CNRS, and FORTH. A "BROWSE ALL" link is also visible.

OpenAIRE Connect Heritage Science

<https://heritage-science.openaire.eu/>

The screenshot shows the 'MONITOR Dashboard' for 'Heritage Science'. It features a navigation bar with links for Home, Deposit, Link, Search, About, Develop, and Manage. A user profile 'Member' is visible in the top right. The main content area displays production statistics in four white boxes with green progress bars: Publications (13,015), Datasets (1,189), Software (71), and Other Research Products (1,080). Below these is a text block describing heritage science as an interdisciplinary field. A summary box on the right lists 30 projects, 7 linked Zenodo communities, 294 data sources, and 8 subjects, along with curator information and creation date. At the bottom, a summary row uses icons to show 13K publications, 1.2K research data, 71 research software, and 1.1K other research products.

MONITOR Dashboard

natural heritage. Heritage science draws on diverse humanities, sciences and engineering disciplines. It focuses on enhancing the understanding, care and sustainable use of heritage so it can enrich people's lives, both today and in the future. Heritage science is an umbrella term encompassing all forms of scientific enquiry into human works and the combined works of nature and humans, of value to people.

The gateway aims at including all the relevant research outcomes in this field.

Heritage Science community gateway is managed by the IPERION HS Research Infrastructure EU project.

[Heritage science](#) is the interdisciplinary domain of scientific study of cultural or natural heritage. Heritage science draws on diverse humanities, sciences and engineering disciplines. It focuses on enhancing the understanding, care and sustainable use of heritage so it can enrich people's lives, both today and in the future. Heritage science is an umbrella term encompassing all forms of scientific enquiry into human works and the combined works of nature and humans, of value to people.

The gateway aims at including all the relevant research outcomes in this field.

Characterization of medieval-like glass alteration layers by laser spectroscopy and nonlinear optical microscopy

Publication > *Journal, Article, Conference object* - 2021 - Spain, Spain - Publisher: Springer Science and Business Media LLC - Funded by: EC | IPERION HS

Authors: [Oujja, Mohamed](#); [Palomar, Teresa](#); [Martinez-Weinbaum, Marina](#); [Martinez-Ramirez, Sagrario](#); [+1 Authors](#)

DOI: [10.1140/epjp/s13360-021-01834-w](#) HANDLE: [10261/248668](#) [10261/262590](#)

Abstract: Historical glass-based objects undergo, since the time of their manufacture, different degradation phenomena that are related to their composition and to the environment to which they were exposed. Three-dimensional (3D) structural and chemical characterization...
